DETAILED ACTION

Response to Amendment

1. Applicant's amendments to the specification and abstract are acknowledged.
Consequently, objection to the specification and abstract is withdrawn.
2. Applicant's arguments regarding claims 1-66 have been fully considered but they are moot in view of the new grounds of rejection presented in this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-66 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention because:

- claims 1, 7, 13, 19 do not recite any operation that results in the maintenance of an index. Furthermore, it is not clear how data reorganization is performed while each root segment is being retained in its storage location. Note the index is merely recited in the preamble and does not seem to play any role in the way the method performs.
- claims 22, 26, 31, 37 do not seem to correspond to what is shown in Figures 1B-22.

The art rejection of claims 1-66 is not being applied because the limitations cannot be ascertained.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the root segments stored in fixed contiguous locations, the correction of an index of data in a reorganization process, the operations before and after reorganization must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
